REPAIR

RATHER THAN
REPLACE!

FOR ALL OF YOUR
CONCRETE LIFTING NEEDS,
LET SPARK'S CONCRETE LIFTING
SOLVE THEM FOR YOU!

BEFORE

AFTER

WHAT IS MUDJACKING?

Mudjacking is a repair technique whereby an engineered "slurry" material is pumped underneath settled concrete. As the mixture is pumped underneath the concrete, it fills voids and creates pressure on the concrete that lifts it upwards back into place creating a solid, stable fill.

MUDJACKING IS USED FOR RE-LEVELING LIGHTWEIGHT STRUCTURES SUCH AS:

- DRIVEWAYS
- STEPS
- SIDEWALKS
- PATIOS

Spark's Concrete Lifting uses an engineered grout material that has been sieve tested in Geo-Tech labs and exceeds the set standard for foundation material.

SPARK'S CONCRETE LIFTING
Repair Rather than Replace

Meet ODIE

Odie is an Australian Cattle Dog, a breed known for their high-energy levels and intelligence. While Odie possesses many desirable traits, he is in need of training to help him reach his full potential. Due to his breed's herding background, Odie is best suited to live in an environment with livestock. This would not only provide him with the necessary physical exercise but also mental stimulation. In a livestock environment, he would be able to use his natural instincts to keep the animals in line and engage in activities that would keep him mentally stimulated. With proper training and a suitable environment, he can thrive and be a loyal companion.
