REPAIR

RATHER THAN REPLACE!

FOR ALL OF YOUR CONCRETE LIFTING NEEDS, LET SPARK'S CONCRETE LIFTING SOLVE THEM FOR YOU!

BEFORE

AFTER

WHAT IS MUDJACKING?

Mudjacking is a repair technique whereby an engineered "slurry" material is pumped underneath settled concrete. As the mixture is pumped underneath the concrete, it fills voids and creates pressure on the concrete that lifts it upwards back into place creating a solid, stable fill.

MUDJACKING IS USED FOR RE-LEVELING LIGHTWEIGHT STRUCTURES SUCH AS:

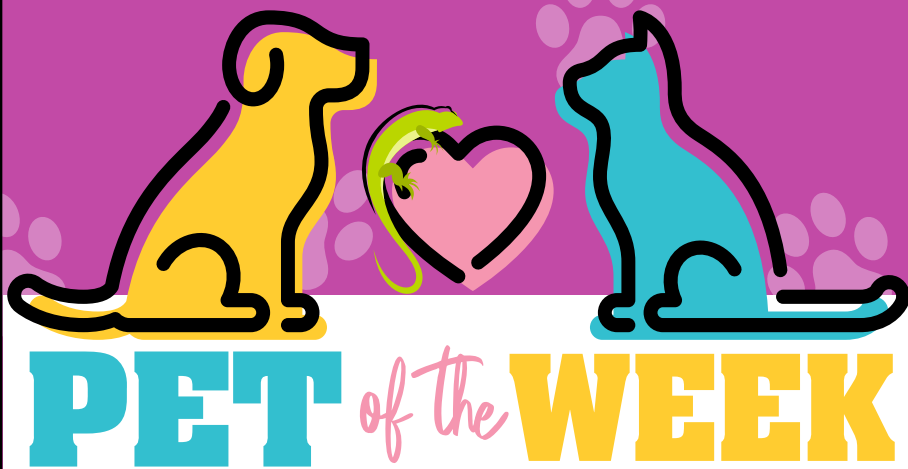

- DRIVEWAYS
- STEPS
- SIDEWALKS
- PATIOS

Spark's Concrete Lifting uses an engineered grout material that has been sieve tested in Geo-Tech labs and exceeds the set standard for foundation material.

SPARK'S CONCRETE LIFTING
Repair Rather than Replace

Meet ROO ROO

My name is Roo Roo. I am a calm cat who prefers a quiet home with no small children and a small amount of animals. I was originally very shy when I first came here and was always hiding or trying to bury myself. Although I still bury myself, I do it more as a comfort thing now and will come out for attention when I am ready. I am very sweet, love getting attention and being petted. Once I am comfortable, I will rub on you and come to you. I have just started playing with other cats here but would prefer a home with one or two other cats; more than that I might not receive the proper amount of attention to help me reach my full potential.
